**Established:** 21<sup>st</sup> December 2015

**Capital Investment:** 4 million Baht

**Slogan:** Building the future restoring the past

**Vision:** We are leading distributor company in Thailand provides modern uPVC windows and doors with high quality with best price for our impressive customers in Thai and Asian region.

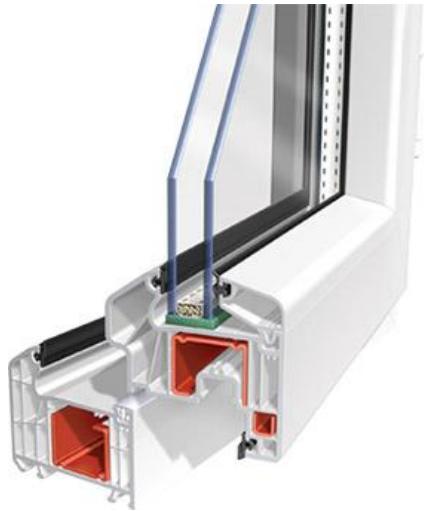

We as Baufens Asia, a leading manufacturer of uPVC Windows and doors in Asia. We are offering latest innovation of uPVC Windows and Doors systems from Europe. We have plenty of choices to offer our customers from high end to standard uPVC windows and Doors. With our over 15 years of experience in Europe we are confident to be one of the leading suppliers of uPVC Windows doors and profile supplier in South East Asia. For this purpose we have established our South East Asia distribution and manufacturing center in the heart of Asia, Bangkok, Thailand. We aim to bring latest innovation of European systems with an affordable price level to target general public in Thailand and surrounding countries.

We manufacture products with high insulation values with the best energy performance and long lasting with minimum maintenance. We have studied the SEA market for several years and we are producing products that are suitable for the climate in the region. We are assured that Baufens products are one of the most suitable uPVC Products for South East Asian market.

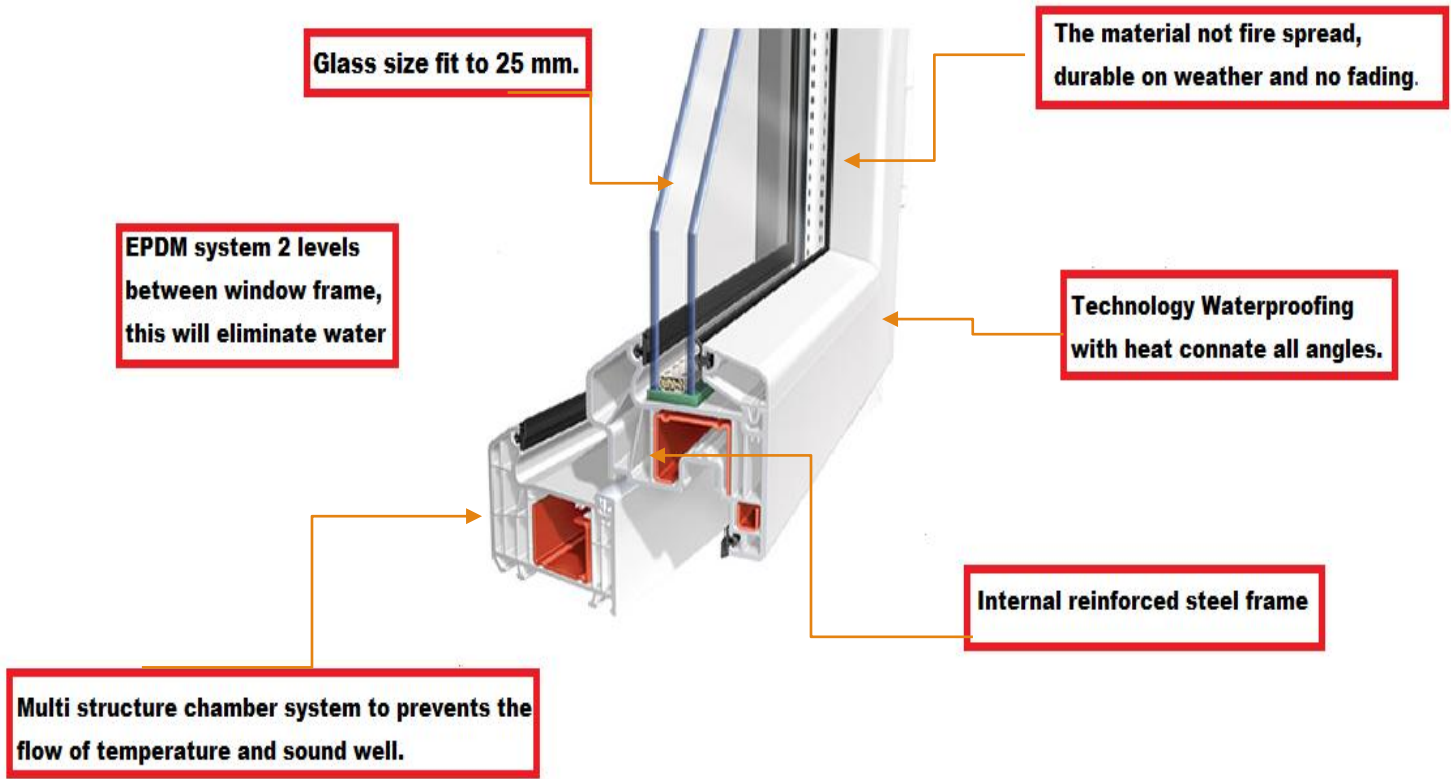

“Build the future, Restore the past”

# What is uPVC ?

uPVC is the shorten word from Unplasticized Poly Vinyl Chloride or Vinyl . it is caused by the chemical processes of petrochemical and other substance. Even though it's name as the plastic name but this plastic is added efficiency substances, the quality performance is as metal it is strong and durable for bumping, weather prevention like heat, UV protection, and for beauty substance etc. Even more, it is long service life, easy care, and unchangeable shape because of reinforced steel frame.

ឈ្មោះអ្នកប្រើប្រាស់

## Weather resistance

- Never stop development Baufens produces long service life material for durable beautiful house, weather resistant whether the heat or wetness from the rain.

## Maintenance saver

- Doors and windows system, durable paint, no peel or fading, safe to rust and even on the seaside weather. it all can save on maintenance costs.

## Advanced Security System

- Advanced security system with lock system Multi point lock and support to defend the robbery

## Thermal performance prevention

- Heat prevention from outside and fire safer

## Material structure and installation of global standards

- The excellent of Substance material structure promptly installation of global standard Strong, durable, termite resistance, long life service, color durable, and reduce maintenance costs.

# Compare properties of uPVC

Subject	uPVC	Aluminium	Wood
Heat prevention	Insulation	As a heat conductor	Insulation
Conductivity	Non - Conductivity	Conductivity	If moisture is present, it may be conductive.
Flammable	Non-flammable	Non-flammable	A good fire
Heat resistance	Resistant to heat and UV radiation	No color longer after exposure to UV radiation	Depends on the color used
Noise canceling	Noise absorption	Conductor noise disturbance	Noise absorption
Leakage	No Leakage due to seam	Chance of leakage at 45 degrees	Possible leakage from shrinkage or breakage
Waterproofing and salinity of hydrochloric acid	Good waterproofing and salinity of hydrochloric acid	Effects of saline water.	Absorbent, water drop takes color coating
Water adhesion	No water adhesion	Water drops when condensed.	When wood take water often. It will decay overtimes.

# Compare properties of uPVC

Subject	uPVC	Aluminium	Wood
Color	No painting	Perhaps baked or painted	Decorative coatings are periodically applied depending on the type of wood.
Scratch	Durable colors none scratched	Glaze will peel off	Insulation
Termite protection	Termites cannot take it	Termites cannot take it	Termites can easily take it
Resistant to moisture and chemicals	Resistant to moisture and chemical vapors.	Decay when get saline vapor or chemical pollutants	Deteriorate that get from Chemical vapors
Friction on opening doors	Glossy and no sound when friction	Open-close sound can be annoying	Shrinkage cause of shape change, not easy to open-close
Material structure	Strong structure and Versatile design	Strong structure	Shrinkage in period of times and shape changeable
Bumps	Stand to bumping, No peel off color because of same composition	Stand to bumping	Possible to damage cause of hard bumping
